The Deanta Story

Deanta Doors is a 100% Irish owned company that designs and manufactures its own range of real wood veneered interior doors, frames, skirting and architrave. Our innovative designs have set the standard in modern and contemporary internal doors. We are driven by three simple ideals; delivering a quality product, excellence in customer service and a determination to continue innovating and leading the field in Interior Doors. We have worked within the door industry for more than 20 years. During this time we have established ourselves as a forwardthinking, innovative company with a mission to revolutionise the door industry. At Deanta, we have a strong set of beliefs that run through everything we do. At Deanta we manufacture and supply a wide range of beautifully crafted stylish interior doors. We have a selection of oak, walnut and white primed doors along with a selection of FD30 fire doors. All Deanta doors are made to the highest standard with only the finest of materials ensuring you get the best from your contemporary Deanta door. We truly care about the experience our customers have when they deal with us. We welcome feedback and continually strive to offer unsurpassed customer care. We are a company that provide solutions, not problems. Deanta has over fifty years of experience in the building and design industry which we strongly feel is fundamental in creating strong, sound working relationships with our clients who are mostly door merchants - and to their customers - designers, architects and builders. That's why they keep coming back to us.

Our Commitment To Quality

Customer satisfaction is Deanta's highest priority. We achieve this goal by continuously improving the cost effectiveness and performance of all our products and processes, as well as focusing on innovation. Unlike other Irish door companies we have our own manufacturing facility. This not only allows us to control stock supply but it also allows us to have full ownership of the quality control process to ensure every door that leaves our factory is of the very highest standard. This also enables us to be extremely competitive on price, as well as surpassing expectations on service and giving us the flexibility to have doors manufactured to completely meet your specification.

Primed Doors

Our Primed collection doors are designed to complement and enhance any interior, from classic to the ultra modern and in the last quarter of 2016 all our primed doors will be coming as "One Coat Finish" as standard which mean your Primed Deanta door will come primed and undercoated and will only require a "One Coat Finish" to give your door the perfect look.

***please note "One Coat Finish" is for lighter colours, darker colours may require a different undercoat - follow paint manufactures advice

PRIMED COLLECTION

HP12 - This door is now available in a non fire rated option ensuring the price is more attractive to the consumer. Please ask your agent for price information

Adjustable Door Casings and Frames

Oak

Walnut

Our removable stop frames and adjustable door casings (frames and architraves) have been specially designed to make life easier for you. Choosing one of our adjustable door casings means that installation is a breeze and one of our kits will fit just about any wall you have in your home. These casings simplify the process of fitting door frames and architraves and give a wonderful finish with moulded and shaker style architrave. Adjustable frames available in 98mm and 125mm versions in Oak or Walnut. Shaker or Moulded Adjustable Architrave.

Standard Door Frame

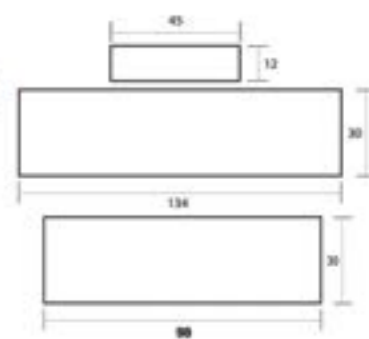

Oak

Walnut

Primed

Our standard door frame features a removable stop allowing you to cover installation markings on the main frame giving a clean and professional finish. Our door frames are solid engineered timber with a veneer wrap finish and is also available as solid engineered oak with veneer.

***Deanta Doors have a new innovative range of easy fit skirting and architrave. The easy-fit range will also be coming to the Oak and Walnut range of skirting and architrave

Skirting:

Excess plaster gathering in the corners, well with the chamfer at the bottom of our easy fit skirting, this is no longer an issue. Size: 4.8mx145mmx-18mm.

Architrave:

Sometimes the plaster and door frame might not line up, well with the 70mm x 2mm rebate at the back of the architrave you will get a smoother finish every time. Sold in packs of five lengths. Size: 90mmx18mm

Corner Block - Primed

Timber corner blocks are a good way to add a stylish finish to architrave.

FIRE DOORS

Intumescent Fire Seal
 Door Gap must be no greater than 3mm and less than 2mm. Intumescent Fire seals must be inserted to the frame. A combined smoke and fire seal is best recommended commonly known as a Brushed Seal.

Glass Intumescent Fire Seal
 Glazing Panels, Intumescent fire resistant seals are also used as part of a glazed system which secures the seals, Fire rated glass to be installed also available from suitable glaziers.

CONTRACT DOORS

Six simple steps to your perfect door

- Receive a consultation with a Deanta Bespoke partner to create your perfect door
- Place your order
- Receive detailed drawings of your door
- Approve your drawings
- Receive a tracking number so you can keep up to date with the production process
- Our craftsmen start creating your door. Once completed, your beautiful bespoke door arrives ready for installation

For more information on Deanta Bespoke please visit our website | www.deantadoors.ie

Your door. Your size. Your style. Our pleasure.

Whilst we are very proud of the Deanta Collection, we feel we should be able to offer our customers an extra special service to enable them to design their perfect door - quickly and easily. With this in mind, we are proud to launch Deanta Bespoke.

Choosing made to measure doors is the right solution if you've been searching for the ideal bespoke doors to fit unusual door frames in your home or if you want a signature door that is completely unique.

Design your perfect door and our skilled craftsmen will bring your ideas to life. We can produce any style of door - panelled, flush, grooved, shaker or fire door with any extras you desire. Choose from any inlays, bespoke beading (including flat beading, recessed beading), glazed or unglazed, any finish and in any size. In fact, the only thing stopping you from achieving your perfect door is your imagination.

We use only the finest, sustainably sourced timber. Our veneer options allow you to select a combination that reflects your taste while complementing your design.

Before we start creating your bespoke door we will provide you with detailed 3D drawings to ensure that your door is produced to your exact specifications and design.

Terms and Conditions

At Deanta Doors we strive to maintain the highest levels of quality on our product range. Our highly trained staff operates a rigorous quality control system to ensure that our product is free from any manufacturing defects ensuring that your door will give many years of good service, provided it is stored correctly and treated properly. Every Deanta door is guaranteed for 10 years from the date of purchase, against faulty material or manufacture, so long as it is treated in accordance with our recommendations.

Please Check Your Goods on Delivery

Signing for receipt of your door(s), either when delivered or collected "unchecked" will not be accepted. Visible damage must be noted at the time, on the delivery/receipt note for any claim to be entertained. Any claims for damaged goods – or where goods supplied do not match those ordered – must be reported within 3 working days of receipt. Every effort is made to supply you with the correct door in perfect condition. However as with all manufacturing process, errors can be made or a door might not be up to standard. It is imperative that you check your doors for any of the following potential faults prior to commencing alterations:

- Visible damage i.e. scratches, dents or chips
- Warping or bowing beyond the 4mm tolerance
- Scratches on glass (if supplied)
- Wrong door model supplied
- Wrong door size supplied
- Two odd doors supplied where they should be a matching pair

The above are examples of potential faults/errors but this list is not exhaustive. If you notice any obvious damage to your door please do not remove from its original packaging.

Storage, Site and Installation Conditions

All doors must be stored in a cool, dry place and should only be stored horizontally on a clean dry surface prior to installation and allowed to acclimatize for at least a week. Timber is a natural product – it expands and contracts with varying climatic conditions. Since we are unable to ascertain how our doors are stored or installed, we cannot give a guarantee against shrinkage, splitting or warping above our stated tolerance. Moisture content of timber needs to be kept at acceptable levels. Deanta doors are manufactured with a moisture content of between 10%-12%. Doors should not be on site until moisture readings are between 40%-60% relative humidity, and until after any forced-drying procedure has been completed.

Making Alterations

Please remember that, fitting or finishing your Deanta door or making alterations in any way will imply you deemed to have accepted the goods as supplied. Unfortunately, we cannot replace a faulty or incorrectly supplied door if ANY ALTERATIONS have been carried out. Assuming that you have checked your door over thoroughly, the maximum that your door can be altered in width is by 2mm off each edge for FD30 and 5mm for non-fire rated doors. However, should you cut into the core of your door and expose the particle board or semi solid core, then the structure of the door will be compromised and this would need to be 'recovered' and then re-sealed immediately – we recommend using qualified installers to carry out the work.

Condition of Sale

In the event of proven manufacturing defect in a door, the seller's liability is limited to the replacement of the door and this shall in all cases not exceed the price of the door. The seller shall not be responsible for any losses or additional costs incurred.

Fitting

Installation of Deanta doors must comply with relevant technical manuals for fire rating which are available on our website or on request. Extra care must be taken when fitting bespoke fire doors. Deanta doors must not be hung in damp or newly plastered rooms or suddenly exposed to central heating or other forms of direct heat.

Cleaning

Damage caused by wet trades or aggressive cleaning is not covered under warranty.
